Hello Cousins,

My name is Kevin Jorrey, I maintain our SZT website and database. The website can be found at www.szt-genealogy.org.

This year we have made several major updates to the website and added several new items. The major change was, we moved from a fixed type of website to a dynamic type. What this means is, it adjusts the displayed content based on the users display type. So, if you view it on a desktop, tablet, or cell phone it scales to that size of screen. It does this by compacting the menus and lengthening the vertical dimensions of the displayed text. Give it a try, if you notice a bug please let me know so I can fix it.

For the Cemetery Index we have embedded a link to the deceased Find a Grave memorial. Just left click on the deceased name and it will take you to it.

In the Database we have added the Find a Grave memorial for deceased members. This is an ongoing task since it is new and there are so many people in the database.
